

Why Choose Revolutionary Eliminator +PLUS?

- 1. Protect Your Livestock:** Eliminate pests that can harm your animals and spread disease. A pest-free environment reduces stress and improves the overall health and productivity of your livestock, ensuring you get the best return on your investment.
- 2. Eco-Friendly Solution:** Unlike traditional chemical pesticides, Eliminator +PLUS is non-toxic and biodegradable. It ensures that no harmful residues are left behind, protecting your farm's ecosystem and contributing to a cleaner environment.
- 3. Versatile Application:** Whether you need to dip, spray, or drench, Eliminator +PLUS provides a flexible solution for various pest control needs. Its versatility saves you time and effort, making pest management simpler and more efficient.
- 4. Cost-Effective:** Eliminator +PLUS reduces the need for multiple products. Its all-in-one formula means fewer purchases, saving you money while maintaining effective pest control. Experience healthier livestock, higher efficiency and lower costs, improving your farm's profitability.

Increase the quality of your livestock, farm, and production by unleashing the power of nature with Eliminator +PLUS.

No Harmful Chemicals, No Killer Pesticides.

Safe. Effective. Natural.

Farm Animals

How It Works

Eliminator +PLUS works by disrupting the pests' ability to breathe. The citric acid derived from our proprietary formula breaks down protein and organic matter, making it a highly effective deterrent. This mechanical action ensures that pests cannot become immune, providing a reliable solution for your livestock farm.

Real Results: Farmers using Eliminator +PLUS have reported significant reductions in pest populations, leading to healthier animals and increased productivity. One satisfied customer stated, "Since using Eliminator +PLUS, we've seen a dramatic decrease in ticks and fleas on our livestock. Our animals are healthier, and our farm is more productive than ever."

**NO HARMFUL CHEMICALS
NO KILLER PESTICIDES**

For more detailed information, visit our website: www.DoctorZymes.com or contact our customer care hotline at 707-984-6094. Or email info@doctorzymes.com

How many times have you had to call the vet because of an infestation of pests, virus, or disease? If you have, not anymore! Eliminator +PLUS keeps the money in our pocket and far more pays for itself when used as directed and throughout the entire production cycle.

Application Instructions

For Livestock:

- **Mix:** 8 oz. of Eliminator +PLUS per 1 gallon of warm water.
- **Use:** Coarse spray or dip to ensure thorough contact with the skin to kill ticks, mites, fleas, etc.

For Livestock Housing:

- **Mix:** 4 oz. of Eliminator +PLUS per 1 gallon of water for prevention.
- **Mix:** 8 oz. of Eliminator +PLUS per 1 gallon of water to eliminate existing pests. Skin contact is important!
- **Use:** High-pressure spray, fine mist, or fog for effective coverage.

For Yards and Surroundings:

- **Mix:** 2 cups of Eliminator +PLUS per 5 gallons of water.
- **Use:** Yard drench to kill pest eggs and larvae.

Effective Use: Consistent application ensures a pest-free environment. Users have found that regular maintenance with Eliminator +PLUS keeps their livestock and facilities free from infestations, leading to a more efficient and stress-free farming.

Experience the Value of Eliminator +PLUS

- **Healthier Livestock:** A pest-free environment means less stress and fewer diseases for your animals, leading to better growth and productivity.
- **Improved Farm Efficiency:** With fewer pests, your animals will thrive, and your farm operations will run more smoothly.
- **Enhanced Environmental Stewardship:** By choosing an eco-friendly product, you contribute to a sustainable future for your farm and the planet.
- **Peace of Mind:** Knowing that your pest control methods are safe for your animals, family, and the environment provides invaluable peace of mind.

Customer Testimonials: "Eliminator +PLUS has transformed our farm. Our livestock are healthier, and we no longer worry about harmful chemicals affecting our animals or the environment. It's a game-changer!" - Sarah L., Farm Owner
